Homework

- 1 ni-lʔθawa-ʔko-n-a 'I pull the branch aside'.
- 2 ni-lʔθawa-ʔko-θite 'I have an extra toe on my foot'.

- 1 ni-lʔθawa-ʔko-n-a 'I pull the branch aside'.
- 2 ni-lʔθawa-ʔko-θite 'I have an extra toe on my foot'.
- 3 In Shawnee, these differ only in the suffix(es) at the end.

- ① ni-lʔθawa-ʔko-n-a 'I pull the branch aside'.
- ② ni-lʔθawa-ʔko-θite 'I have an extra toe on my foot'.
- ③ In Shawnee, these differ only in the suffix(es) at the end.
- ④ I + forked-outline + tree-like + by-hand-action + done-to-something.

- ① ni-lʔθawa-ʔko-n-a 'I pull the branch aside'.
- ② ni-lʔθawa-ʔko-θite 'I have an extra toe on my foot'.
- ③ In Shawnee, these differ only in the suffix(es) at the end.
- ④ I + forked-outline + tree-like + by-hand-action + done-to-something.
- ⑤ I + forked-outline + tree-like + concerning-the-toes.

- ① ni-lʔθawa-ʔko-n-a ‘I pull the branch aside’.
- ② ni-lʔθawa-ʔko-θite ‘I have an extra toe on my foot’.
- ③ In Shawnee, these differ only in the suffix(es) at the end.
- ④ I + forked-outline + tree-like + by-hand-action + done-to-something.
- ⑤ I + forked-outline + tree-like + concerning-the-toes.
- ⑥ English construes these two situations totally differently – it doesn’t “see” the similarity.

- 1 ni-lʔθawa-ʔko-n-a ‘I pull the branch aside’.
- 2 ni-lʔθawa-ʔko-θite ‘I have an extra toe on my foot’.
- 3 In Shawnee, these differ only in the suffix(es) at the end.
- 4 I + forked-outline + tree-like + by-hand-action + done-to-something.
- 5 I + forked-outline + tree-like + concerning-the-toes.
- 6 English construes these two situations totally differently – it doesn’t “see” the similarity.
- 7 The grammar of a natural human language is a collective, unconscious theory of reality.

- 1 ni-lʔθawa-ʔko-n-a ‘I pull the branch aside’.
- 2 ni-lʔθawa-ʔko-θite ‘I have an extra toe on my foot’.
- 3 In Shawnee, these differ only in the suffix(es) at the end.
- 4 I + forked-outline + tree-like + by-hand-action + done-to-something.
- 5 I + forked-outline + tree-like + concerning-the-toes.
- 6 English construes these two situations totally differently – it doesn’t “see” the similarity.
- 7 The grammar of a natural human language is a collective, unconscious theory of reality.
- 8 Can some interpretations of reality be ‘more successful’ than others?

**Table 5(8)** Unmarked present tense with material and mental processes

|          | <b>present</b>   | <b>present in present</b>   |
|----------|--|---|
| material | [marked]<br>they build a house (for every employee)<br>[habitual; generalized] | [unmarked]<br>they're building a house                            |
| mental   | [unmarked]<br>I know the city  | [marked]<br>I'm knowing the city (for the first time) [inceptive] |

## Process types in English are *cryptotypes*

- Process types in English are ‘cryptotypes’.
- Cryptotypes are ‘covert’ semantic categories that have no explicit ‘mark’ – you can’t recognize them. (Is “think” really a mental process? – In a moment we’ll find out.)

**Table 5(8)** Unmarked present tense with material and mental processes

|          | <b>present</b>   | <b>present in present</b>   |
|----------|--|---|
| material | [marked]<br>they build a house (for every employee)<br>[habitual; generalized] | [unmarked]<br>they're building a house                            |
| mental   | [unmarked]<br>I know the city  | [marked]<br>I'm knowing the city (for the first time) [inceptive] |

## Process types in English are *cryptotypes*

- Process types in English are ‘cryptotypes’.
- Cryptotypes are ‘covert’ semantic categories that have no explicit ‘mark’ – you can’t recognize them. (Is “think” really a mental process? – In a moment we’ll find out.)
- Cryptotypes (like PROCESS TYPE in English) react with ‘overt’ semantic categories (like TENSE in English) in surprising ways.

**Table 5(8)** Unmarked present tense with material and mental processes

|          | <b>present</b>   | <b>present in present</b>   |
|----------|--|---|
| material | [marked]<br>they build a house (for every employee)<br>[habitual; generalized] | [unmarked]<br>they're building a house                            |
| mental   | [unmarked]<br>I know the city  | [marked]<br>I'm knowing the city (for the first time) [inceptive] |

## Process types in English are *cryptotypes*

- Process types in English are ‘cryptotypes’.
- Cryptotypes are ‘covert’ semantic categories that have no explicit ‘mark’ – you can’t recognize them. (Is “think” really a mental process? – In a moment we’ll find out.)
- Cryptotypes (like PROCESS TYPE in English) react with ‘overt’ semantic categories (like TENSE in English) in surprising ways.
- That’s how they exist, and are transmitted to the next generation, and can be discovered and studied (if you dig deeply – even though you’re not supposed to).

**Table 5(8)** Unmarked present tense with material and mental processes

|          | <b>present</b>   | <b>present in present</b>   |
|----------|--|---|

## Transitive vs. ergative interpretations of processes

- In a **transitive** interpretation of a material process, someone ‘acts’.
- Either that’s that (‘intransitive’), or else the action ‘goes through’, ‘goes across’ (‘transitive’) and impacts on another participant (the Goal).
- This is a ‘linear-mechanical’ theory of reality.
- In an **ergative** interpretation of any process, the process manifests itself “in the medium of” someone or something: “My pocket tore!” (the tearing happened in the cloth of the pocket).
- Either that’s that (‘middle’), or else the process was brought about by an external agent (‘effective’): “That hook tore my pocket!”
- This is a ‘technological-magical’ theory of reality.
- English uses both theories in modelling processes, so we’ll use both (more specific) **transitive** labelling (Actor, Goal, Recipient; Senser, Phenomenon; etc.) and (more general) **ergative** labelling (Medium, Agent, Beneficiary, Range).

| Directionality:                  | one way                                 | one way            | two way: phase type | like type               | one way                           | one way             | one way           |
| Voice:                           | middle or effective                     | middle             | effective           | middle                  | middle or effective (target type) | middle or effective | middle            |
| Type of receptive:               |   | receptive          | receptive           | medio-receptive         |                                   | receptive           |                   |
| Pro-verbs:                       | do                                      | do to/with         | do                  | (do to)                 |                                   |                     |                   |
| Unmarked present tense:          | present in present                      | present in present | simple present      | simple present          | simple present                    | simple present      | simple present    |
| Accentuation of verb:            | accented                                | accented           | accented            | (either)                | (either)                          | unaccented          | unaccented        |

## There are grammatical criteria for distinguishing process types

- See page 3 of your three-page handout.
- What are you doing ('right now')? (present-in-present tense → material process)
- Quiet! I'm thinking! (present-in-present tense → material (or behavioural?))
- What do you think ('right now')? (simple present tense → mental process)
- I think it's a good idea. (projects a proposition as a 'that'-clause in a 'Denkblase' → mental process)

Table 5(45) Criteria for distinguishing process types

|                                 | verbal                                  | behav.             | mental              | verbal                  | relational<br>attributive         | identifying         | existential       |
|---------------------------------|---|--------------------|---------------------|-------------------------|-----------------------------------|---------------------|-------------------|
| Category meaning                | doing (thing, happening, doing to/with) | behaving           | sensing             | saying                  | being (attribute)                 | being (identity)    | being (existence) |
| Number of inherent participants | 1 or 2                                  | 1                  | 2                   | 1                       | 1                                 | 2                   | 1 or 0            |
| Nature of 1st participant       | thing                                   | conscious thing    | conscious thing     | symbol source           | thing or fact                     | thing or fact       | thing or fact     |
| Nature of second participant    | thing                                   |                    | thing or fact       |                         |                                   | (same as 1st)       |                   |
| Ability to project              | --                                      | --                 | projection of ideas | projection of occasions | --                                | --                  | --                |
| Directionality                  | one way                                 | one way            | two way: phase type | like type               | one way                           | one way             | one way           |
| Voice                           | middle or effective                     | middle             | effective           | middle                  | middle or effective (target type) | middle or effective | middle            |
| Type of receptive:              |   | receptive          |                     | receptive               | medio-receptive                   |                     | receptive         |
| Pro-verbs                       | do                                      | do to/with         | do                  | (do to)                 |                                   |                     |                   |
| Unmarked present tense:         | present in present                      | present in present | simple present      | simple present          | simple present                    | simple present      | simple present    |
| Accentuation of verb:           | accented                                | accented           | accented            | (either)                | (either)                          | unaccented          | unaccented        |

## There are grammatical criteria for distinguishing process types

- See page 3 of your three-page handout.
- What are you doing ('right now')? (present-in-present tense → material process)
- Quiet! I'm thinking! (present-in-present tense → material (or behavioural?))
- What do you think ('right now')? (simple present tense → mental process)
- I think it's a good idea. (projects a proposition as a 'that'-clause in a 'Denkblase' → mental process)
- It's not JUST a question of what you think a clause means... you need firm grammatical evidence!

Table 5(45) Criteria for distinguishing process types

|                                 | verbal                                  | behav.             | mental               | verbal                  | relational<br>attributive         | identifying         | existential       |
|---------------------------------|---|--------------------|----------------------|-------------------------|-----------------------------------|---------------------|-------------------|
| Category meaning                | doing (doing, happening, doing to/with) | behaving           | sensing              | saying                  | being (attributive)               | being (identity)    | being (existence) |
| Number of inherent participants | 1 or 2                                  | 1                  | 2                    | 1                       | 1                                 | 2                   | 1 or 0            |
| Nature of 1st participant       | thing                                   | conscious thing    | conscious thing      | symbol source           | thing or fact                     | thing or fact       | thing or fact     |
| Nature of second participant    | thing                                   |                    | thing or fact        |                         |                                   | (same as 1st)       |                   |
| Ability to project              | --                                      | --                 | projection of ideas  | projection of occasions | --                                | --                  | --                |
| Directionality                  | one way                                 | one way            | two way: phrase type | like type               | one way                           | one way             | one way           |
| Voice:                          | middle or effective                     | middle             | effective            | middle                  | middle or effective (target type) | middle or effective | middle            |
| Type of receptive:              |   | receptive          |                      | receptive               | medio-receptive                   |                     | receptive         |
| Pro-verbs                       | do                                      | do to/with         | do                   | (do to)                 |                                   |                     |                   |
| Unmarked present tense:         | present in present                      | present in present | simple present       | simple present          | simple present                    | simple present      | simple present    |
| Accentuation of verb:           | accented                                | accented           | accented             | (either)                | (either)                          | unaccented          | unaccented        |

Homework

- Your homework for next week is to go through the six-page handout again.

In case you missed the class, that handout is also available here:

<http://www.spence.saar.de/courses/grammar/questions05a/index.pdf>

- The three-page handout is available here: [http://www.spence.saar.de/courses/grammar/unit05a/handout\\_5a.pdf](http://www.spence.saar.de/courses/grammar/unit05a/handout_5a.pdf)

## Acknowledgements, further reading, other sources

Most of the ideas presented here come from M.A.K. Halliday, *An Introduction to Functional Grammar*, 2nd edition 1994 (“IFG2”) or 3rd edition 2004 (“IFG3”).

Further reading: IFG2, chapter 5; or IFG3, chapter 5.
