

Unit 4 (b)

Modality

The area between “yes” and “no”

Slides for the session of

Exploring English Grammar – the world of clauses

held on

13.xii.2021

Robert Spence
LangSciTech
Saarland University

The learning goals for today's session are:

γρα

Modality

Goals

The learning goals for today's session are:

- 1 To understand how modal verbs differ from other verbs in English.

γρα

Modality

Goals

The learning goals for today's session are:

- ① To understand how modal verbs differ from other verbs in English.
- ② To learn which verbs are “in” (or “on the edge of”) the system of modal verbs.

γρα

Modality

Goals

The learning goals for today's session are:

- ① To understand how modal verbs differ from other verbs in English.
- ② To learn which verbs are “in” (or “on the edge of”) the system of modal verbs.
- ③ To understand the difference between the
“indicative” TYPE of MODALITY
(either PROBABILITY or USUALITY (a.k.a. “indefinite frequency”))
and the
“imperative” TYPE
(either OBLIGATION or INCLINATION (a.k.a. READINESS/ABILITY)).

The learning goals for today's session are:

- ① To understand how modal verbs differ from other verbs in English.
- ② To learn which verbs are “in” (or “on the edge of”) the system of modal verbs.
- ③ To understand the difference between the
“indicative” TYPE of MODALITY
(either PROBABILITY or USUALITY (a.k.a. “indefinite frequency”))
and the
“imperative” TYPE
(either OBLIGATION or INCLINATION (a.k.a. READINESS/ABILITY)).
- ④ To understand the various ways in which modality can be expressed (verbs, adverbs, and other structures) and how these encode subjectivity or objectivity.

The learning goals for today's session are:

- 1 To understand how modal verbs differ from other verbs in English.
- 2 To learn which verbs are “in” (or “on the edge of”) the system of modal verbs.
- 3 To understand the difference between the
“indicative” TYPE of MODALITY
(either PROBABILITY or USUALITY (a.k.a. “indefinite frequency”))
and the
“imperative” TYPE
(either OBLIGATION or INCLINATION (a.k.a. READINESS/ABILITY)).
- 4 To understand the various ways in which modality can be expressed (verbs, adverbs, and other structures) and how these encode subjectivity or objectivity.
- 5 To understand the difference between the two ways in which [negative] POLARITY can be expressed – [direct] and [transferred].

The learning goals for today's session are:

- 1 To understand how modal verbs differ from other verbs in English.
- 2 To learn which verbs are “in” (or “on the edge of”) the system of modal verbs.
- 3 To understand the difference between the
“indicative” TYPE of MODALITY
(either PROBABILITY or USUALITY (a.k.a. “indefinite frequency”))
and the
“imperative” TYPE
(either OBLIGATION or INCLINATION (a.k.a. READINESS/ABILITY)).
- 4 To understand the various ways in which modality can be expressed (verbs, adverbs, and other structures) and how these encode subjectivity or objectivity.
- 5 To understand the difference between the two ways in which
[negative] POLARITY can be expressed – [direct] and [transferred].
- 6 To understand the difference between the [median] VALUE of MODALITY (‘will’) and the [outer] VALUES (either [high] ‘must’ or [low] ‘may’), by studying how they interact with [transferred] [negative] POLARITY.

How do modal verbs differ from other verbs in English?

γρα

Modality

Goals

How do modal verbs differ from other verbs in English?

γρα

Modality

Goals

- ① No non-finite forms: no infinitive (**to can*), no ‘-ing’ form (**canning*) – unlike German.

How do modal verbs differ from other verbs in English?

- ① No non-finite forms: no infinitive (**to can*), no '-ing' form (**canning*) – unlike German.
- ② No ending on third person singular present (*she can* not **she cans*) – like German.

How do modal verbs differ from other verbs in English?

- ① No non-finite forms: no infinitive (**to can*), no ‘-ing’ form (**canning*) – unlike German.
- ② No ending on third person singular present (*she can* not **she cans*) – like German.
- ③ A ‘remote’ form (e.g. *could*), which is more likely to indicate remoteness in reality (cf. *könnte*) rather than remoteness in time (cf. *konnte*).

How do modal verbs differ from other verbs in English?

- ① No non-finite forms: no infinitive (**to can*), no ‘-ing’ form (**canning*) – unlike German.
- ② No ending on third person singular present (*she can* not **she cans*) – like German.
- ③ A ‘remote’ form (e.g. *could*), which is more likely to indicate remoteness in reality (cf. *könnte*) rather than remoteness in time (cf. *konnte*).
- ④ Combinable with *n’t*: (*she can’t*; cf. **she walkn’t*).

How do modal verbs differ from other verbs in English?

- ① No non-finite forms: no infinitive (**to can*), no ‘-ing’ form (**canning*) – unlike German.
- ② No ending on third person singular present (*she can* not **she cans*) – like German.
- ③ A ‘remote’ form (e.g. *could*), which is more likely to indicate remoteness in reality (cf. *könnte*) rather than remoteness in time (cf. *konnte*).
- ④ Combinable with *n’t*: (*she can’t*; cf. **she walkn’t*).
- ⑤ Function as finite verbal operators – *she can ...* (indicative) vs. e.g. *can she ... ?* (yes/no interrogative).

How do modal verbs differ from other verbs in English?

- ① No non-finite forms: no infinitive (**to can*), no '-ing' form (**canning*) – unlike German.
- ② No ending on third person singular present (*she can* not **she cans*) – like German.
- ③ A 'remote' form (e.g. *could*), which is more likely to indicate remoteness in reality (cf. *könnte*) rather than remoteness in time (cf. *konnte*).
- ④ Combinable with *n't*: (*she can't*; cf. **she walkn't*).
- ⑤ Function as finite verbal operators – *she can ...* (indicative) vs. e.g. *can she ... ?* (yes/no interrogative).
- ⑥ Function in tags – *she can ..., can't she?*

How do modal verbs differ from other verbs in English?

- ① No non-finite forms: no infinitive (**to can*), no '-ing' form (**canning*) – unlike German.
- ② No ending on third person singular present (*she can* not **she cans*) – like German.
- ③ A 'remote' form (e.g. *could*), which is more likely to indicate remoteness in reality (cf. *könnte*) rather than remoteness in time (cf. *konnte*).
- ④ Combinable with *n't*: (*she can't*; cf. **she walkn't*).
- ⑤ Function as finite verbal operators – *she can ...* (indicative) vs. e.g. *can she ... ?* (yes/no interrogative).
- ⑥ Function in tags – *she can ..., can't she?*
- ⑦ Have I forgotten anything?

What about marginal cases?

γρα

Modality

Goals

What about marginal cases?

- You needn't do that [true modal] ('das musst du nicht tun')

γρα

Modality

Goals

What about marginal cases?

- You needn't do that [true modal] ('das musst du nicht tun')
- You don't need to do that [marginal] ('das brauchst du nicht zu tun')

What about marginal cases?

- You needn't do that [true modal] ('das musst du nicht tun')
- You don't need to do that [marginal] ('das brauchst du nicht zu tun')
- in need – in Not – benötigen

What about marginal cases?

- You needn't do that [true modal] ('das musst du nicht tun')
- You don't need to do that [marginal] ('das brauchst du nicht zu tun')
- in need – in Not – benötigen
- I dare say! / I daren't do it!

What about marginal cases?

- You needn't do that [true modal] ('das musst du nicht tun')
- You don't need to do that [marginal] ('das brauchst du nicht zu tun')
- in need – in Not – benötigen
- I dare say! / I daren't do it!
- ich darf sagen! (ich bin so frei; ich erlaube mir) / ich wage es nicht, das zu tun!

What about marginal cases?

- You needn't do that [true modal] ('das musst du nicht tun')
- You don't need to do that [marginal] ('das brauchst du nicht zu tun')
- in need – in Not – benötigen
- I dare say! / I daren't do it!
- ich darf sagen! (ich bin so frei; ich erlaube mir) / ich wage es nicht, das zu tun!
- *need* and *dare* are 'on the way out' of the system

What about marginal cases?

- You needn't do that [true modal] ('das musst du nicht tun')
- You don't need to do that [marginal] ('das brauchst du nicht zu tun')
- in need – in Not – benötigen
- I dare say! / I daren't do it!
- ich darf sagen! (ich bin so frei; ich erlaube mir) / ich wage es nicht, das zu tun!
- *need* and *dare* are 'on the way out' of the system
- *better* may be 'on the way in' (we better let it in, bettern't we?)

- You needn't do that [true modal] ('das musst du nicht tun')
- You don't need to do that [marginal] ('das brauchst du nicht zu tun')
- in need – in Not – benötigen
- I dare say! / I daren't do it!
- ich darf sagen! (ich bin so frei; ich erlaube mir) / ich wage es nicht, das zu tun!
- *need* and *dare* are 'on the way out' of the system
- *better* may be 'on the way in' (we better let it in, bettern't we?)
- Even if verbs come in, or go out, or shift around within the system – wenn du magst ('wenn du das tun willst'); wenn du vermagst, das zu tun ('wenn du das tun kannst') – the ARCHITECTURE of the system remains the same, with [high], [median], [low] values.

Simultaneous systems, so $4 \times 4 \times 3 \times 3$ combinations; in reality ($* \rightarrow \rightarrow *$) only 12×9 .

MODALITY TYPE and VALUE (1) — MODALIZATION (the “indicative” type)

- This is MODALIZATION (the “indicative” type of MODALITY).
- It spans the gap between “it is” and “it isn’t”.
- It is typically expressed by either a modal verb, or a modal adverb, or both together:
 - that’ll be Professor Steiner at the door (‘right now’)
 - that’s probably Professor Steiner at the door
 - that’ll probably be Professor Steiner at the door
- There are two dimensions:
 - PROBABILITY (certainly/probably/possibly) and USUALITY (“indefinite frequency”) (always/usually/sometimes)

PROBABILITY and USUALITY compared:

$\gamma\rho\alpha$

Modality

Goals

PROBABILITY and USUALITY compared:

- That'll be Professor Steiner at the door ('that's probably him – not in the future, but right now')

γρα

Modality

Goals

PROBABILITY and USUALITY compared:

- That'll be Professor Steiner at the door ('that's probably him – not in the future, but right now')
- Oh the students'll lie on the lawn all day in summer ('they usually do that – not next summer, but every summer')

PROBABILITY and USUALITY compared:

- That'll be Professor Steiner at the door ('that's probably him – not in the future, but right now')
- Oh the students'll lie on the lawn all day in summer ('they usually do that – not next summer, but every summer')
- Probability 75% → Expectation of 75 / 100 occurrences

PROBABILITY and USUALITY compared:

- That'll be Professor Steiner at the door ('that's probably him – not in the future, but right now')
- Oh the students'll lie on the lawn all day in summer ('they usually do that – not next summer, but every summer')
- Probability 75% -> Expectation of 75 / 100 occurrences
- cf. flipping a coin: probability of Heads is 50%, so if you flipped the coin 100 times you would expect to get Heads approx. 50 times and Tails approx. 50 times.

PROBABILITY and USUALITY compared:

γρα

Modality

Goals

- That'll be Professor Steiner at the door ('that's probably him – not in the future, but right now')
- Oh the students'll lie on the lawn all day in summer ('they usually do that – not next summer, but every summer')
- Probability 75% -> Expectation of 75 / 100 occurrences
- cf. flipping a coin: probability of Heads is 50%, so if you flipped the coin 100 times you would expect to get Heads approx. 50 times and Tails approx. 50 times.
- Two different ways of expressing less-than-certain knowledge: paradigmatically ('either-yes-or-no': how likely?) or syntagmatically ('both-yes-and-no': how often? (how usual?))

- That'll be Professor Steiner at the door ('that's probably him – not in the future, but right now')
- Oh the students'll lie on the lawn all day in summer ('they usually do that – not next summer, but every summer')
- Probability 75% → Expectation of 75 / 100 occurrences
- cf. flipping a coin: probability of Heads is 50%, so if you flipped the coin 100 times you would expect to get Heads approx. 50 times and Tails approx. 50 times.
- Two different ways of expressing less-than-certain knowledge: paradigmatically ('either-yes-or-no': how likely?) or syntagmatically ('both-yes-and-no': how often? (how usual?))
- Adverbs expressing usuality are sometimes called 'adverbs of indefinite frequency'; like modal adverbs of probability they are part of the Mood element, just like the Subject and the Finite and the Polarity — because they're not just part of WHAT you're asserting, they're part of the ACT OF ASSERTING it !!

'Double' modality

γρα

Modality

Goals

- If modalization is expressed doubly (verb AND adverb), then:

- If modalization is expressed doubly (verb AND adverb), then:
- if it's the same VALUE each time, it counts once:

- If modalization is expressed doubly (verb AND adverb), then:
- if it's the same VALUE each time, it counts once:
- that probably will be him -> it's probable that it's him (NOT: it's probable that it's probable that it's him)

- If modalization is expressed doubly (verb AND adverb), then:
- if it's the same VALUE each time, it counts once:
- that probably will be him -> it's probable that it's him (NOT: it's probable that it's probable that it's him)
- if it's a different VALUE each time, it counts twice:

- If modalization is expressed doubly (verb AND adverb), then:
- if it's the same VALUE each time, it counts once:
- that probably will be him → it's probable that it's him (NOT: it's probable that it's probable that it's him)
- if it's a different VALUE each time, it counts twice:
- that certainly might be him → it's certain that it's possible that it's him

- Term “A” (= universal affirmative): *All Australians are the descendants of convicts* (cf. *Australians are certainly... Australians are always...*)
- Term “I” (= particular affirmative): *Some Australians are...* (cf. *Australians are possibly... Australians are sometimes...*)

Combining [outer] VALUE and [transferred] [negative] POLARITY (1)

[outer] VALUE and [transferred] [negative] POLARITY (2)

[outer] VALUE and [transferred] [negative] POLARITY (3)

γπα

Modality

Goals

Note that probability, in itself, can only ever be positive, never negative (i.e. it is always somewhere between p 0 (0%) and p 1 (100%)). However, you can ‘metaphorically’ ‘transfer’ the negative marker – from the process itself to the Modality on the process. In so doing, you cause something interesting to happen:

[outer:high]

[negative:direct]

[negative:transferred]

it's **certain** that it isn't him – it isn't **possible** that it's him

[median]

[negative:direct]

[negative:transferred]

it's **probable** that it isn't him – it isn't **probable** that it's him

[outer:low]

[negative:direct]

[negative:transferred]

it's **possible** that it isn't him – it isn't **certain** that it's him

Similar things happen with all four types of modality. (Try it!)

ORIENTATION [subjective] / [objective] and EXPLICITNESS [implicit] / [explicit]

γρα

Modality

Goals

The explicit forms (which are ‘grammatical metaphors’) are only possible with PROBABILITY and OBLIGATION, not (yet) with USUALITY or INCLINATION.

For highschool literary appreciation essays choose explicitly subjective assessments of probability.

For university science essays dress up your assessments of probability by making them explicitly objective.

ORIENTATION [subjective] / [objective] and EXPLICITNESS [implicit] / [explicit]

γρα

Modality

Goals

The explicit forms (which are ‘grammatical metaphors’) are only possible with PROBABILITY and OBLIGATION, not (yet) with USUALITY or INCLINATION.

- 1) I know that he did it (subjective: explicit) MOST SUBJECTIVE

For highschool literary appreciation essays choose explicitly subjective assessments of probability.

For university science essays dress up your assessments of probability by making them explicitly objective.

ORIENTATION [subjective] / [objective] and EXPLICITNESS [implicit] / [explicit]

γρα

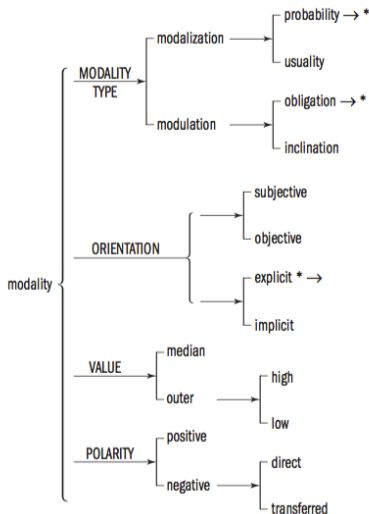

Fig. 4-25 System network of MODALITY

Simultaneous systems, so $4 \times 4 \times 3 \times 3$ combinations; in reality ($* \rightarrow \rightarrow *$) only 12×9 .

MODALITY TYPE and TENSE

MODALIZATION is always tenseless (although combinable with **any** tense of the main verb); so the remote form means “remote in REALITY”.

γπα

Modality

Goals

MODALITY TYPE and TENSE

MODALIZATION is always tenseless (although combinable with **any** tense of the main verb); so the remote form means “remote in REALITY”. But

MODULATION can have **any** tense (combining with – basically – a tenseless main verb).

γρα

Don't be fooled by grammarians pretending to be philosophers! The grammar of a natural human language IS its OWN philosophy, and DOES contain the notion '100% certain knowledge of the future'!!

- Your homework for next week is to complete Exercise Sheet 4b, which was handed out in class and which contains a page from last summer semester's exam.

In case you missed the class, the exercise sheet is also available here:

<http://www.spence.saar.de/courses/grammar/questions04b/index.pdf>

Most of the ideas presented here come from M.A.K. Halliday, *An Introduction to Functional Grammar*, 2nd edition 1994 (“IFG2”) or 3rd edition 2004 (“IFG3”).

Further reading: Halliday 2004, chapter 4.5 and chapter 10.3 (or Halliday 1994, chapter 4.5 and chapter 10.4).
