### Resources

1 To understand four choices we'll make about how to 'do' grammar:

- 1 Descriptive vs prescriptive grammar
- 2 Lexis + Grammar = Lexicogrammar
- 3 Functional vs formal grammar
- 4 Systemic vs structural grammar

2 To introduce some concepts useful in studying grammar

 Lay people often say grammar is about prescribing what is good, or proscribing what is bad.

Clause as interaction: MOOD

Clause as representation: TRANSITIVITY

Clause as message: THEME

## Situating grammar

- Lay people often say grammar is about prescribing what is good, or proscribing what is bad.
- A modern grammarian just describes how people actually use language (rather than how they think they do, or claim to do)
- Grammatical "rules" therefore need to be reinterpreted as something like "laws of nature" (like gravity, or conservation of energy, or evolution by means of natural selection): generalized statements of observed fact.

## Situating grammar

- Lay people often say grammar is about prescribing what is good, or proscribing what is bad.
- A modern grammarian just describes how people actually use language (rather than how they think they do, or claim to do)
- Grammatical "rules" therefore need to be reinterpreted as something like "laws of nature" (like gravity, or conservation of energy, or evolution by means of natural selection): generalized statements of observed fact.
- We'll try to work with real examples taken from linguistic corpora; but sometimes, when trying to illustrate a particular grammatical point, it can be convenient to use (carefully) constructed examples.

### Situating grammar

## Situating English grammar—the grammar of a nice cup of tea

(...)

Lastly, tea—unless one is drinking it in the Russian style—should be drunk *without sugar*. I know very well that I am in a minority here. But still, how can you call yourself a true tea-lover if you destroy the flavour of your tea by putting sugar in it? It would be equally reasonable to put in pepper or salt. Tea is meant to be bitter, just as beer is meant to be bitter. If you sweeten it, you are no longer tasting the tea, you are merely tasting the sugar; you could make a very similar drink by dissolving sugar in plain hot water.

Some people would answer that they don't like tea in itself, that they only drink it in order to be warmed and stimulated, and they need sugar to take the taste away. To those misguided people I would say: Try drinking tea without sugar for, say, a fortnight and it is very unlikely that you will ever want to ruin your tea by sweetening it again.

(...)

-George Orwell, 'A Nice Cup of Tea' (1946).
