Reprising STRATUM: Phonology (phonemics), phonetics, physics

There are different LEVELS a.k.a. STRATA in language, as well as different MANIFESTATIONS (e.g. written and spoken). It often helps to analogize between the spoken and the written:

TIN STEP LETDOWN		lexicogrammar
<t>	/t/	{graph phon}emics
τ ʈ ɮ	[tʰ] [t] [t̚]	{graph phon}etics
photons	sound waves	physical reality

Note the conventions: <t> /t/ [t]
see Eckert & Barry, p. 289.

PHONETIC SCHEME

Consonants: b; ch (*chín*); d; dh (*dhe* = *the*); f; g (*go*); h; j; k; l; m; n; ng (*sing*); ngg (*finger*); p; r; s (*sip*); sh (*ship*); t; th (*thin*); v; w; y; z; zh (*vizhn* = *vision*).

Vowels: ā ē ī ō ū ōō (mate mete mite mote mute moot)

ă ě ĭ ŏ ũ ōō (rack reck rick rock ruck rook)

ār ēr ĩr ōr ūr (mare mere mire more mure)

ār ēr ōr (part pert port)

ah aw oi oor ow owr (bah bawl boil boor brow bower)

Vowels marked ̄ may be pronounced either way, e.g. pātriot (pā- or pā-). In all vowel symbols with r (ār, ēr, etc.), the r, besides influencing the vowel sound, has its consonantal value when followed by a vowel in the next syllable of the word or in the following word (in *fearing* but not in *fearful*, in *far away* but not in *far gone*).

- You don't do functional grammar (which is a sin of omission on the part of your other teachers), but if you did do it, you might ask whether, to use linguistic baby-talk, ⟨*hail*⟩ in ⟨*an American who hailed from Kansas*⟩ behaves more like a verb of 'doing' or more like a verb of 'being'.

 - George Bernard Shaw parodied this in his play *Pygmalion*, which was turned into a musical called *My Fair Lady*, which was then filmed, starring the immortal Audrey Hepburn as a young Cockney woman who is taught by a professor of phonetics to speak like a high-society lady. Here she learns to say *the rain in Spain* instead of the Cockney/Australian ("Strine") *the rine in Spine*.
